

RONNHILL

SPECIALS
2022

An Introduction to Ronhill Specials.

RONHILL SPECIALS are made under license by **RIDGEWAY TEXTILES** in the United Kingdom.

We are one of the UK's leading manufacturers of bespoke custom sportswear. Based in Sutton-in-Ashfield, Nottinghamshire we've been making bespoke club, charity and corporate kit since 1983 and are now regarded as a leading supplier to that market.

Our garments are made in house from start to finish. To keep the company at the forefront of the club kit market we've made a significant investment into our own sublimation printing infrastructure, which allows garments to be manufactured directly onsite. This gives far more flexibility to the business and results in quicker turnaround times for the customer.

As well as the standard Pantone colours available we also have the facility to print fluorescent shades if required. As the garments are made directly in the factory, the fit/length can be amended as necessary and there are specific male, female and unisex fit patterns.

The supply of hoodies & beanie hats with club branding is also available. Ridgeway work with a wide range of different coloured technical fabrics which are produced locally and offer a wide range of design options, if you can think of it, we can design and manufacture it.

In simple terms we can make what any club or team —large or small — requires!

"We have used UK-produced fabrics since the business started we are always keen to support UK manufacturing," says owner Andrew Aked. So if your club is looking for new gear and want something fresh exciting and UK made, give us a call.

PRINTING AND EMBELLISHMENT OPTIONS

Ron Hill Specials have been applying logos to garments since 1983 and in that time the technology has changed a lot, but it means we have the machinery to print whatever you want, however you want

Sublimation Print.

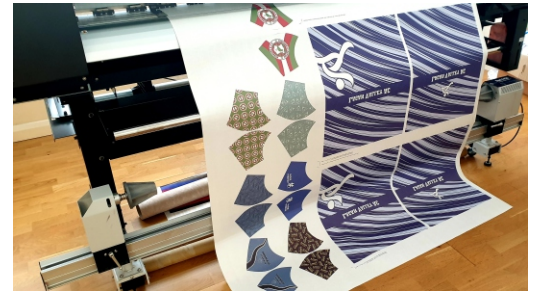

We have invested in our own sublimation printing press, sublimation inks are printed onto special papers, the ink is then heat pressed into the fabric, the design becomes part of the fabric, no ink sits on top of the garment, and the fabric remains fully breathable, it will not fade, scratch or wear off.

Heat Logos

Heat logos are a rubberised film which can be colour printed and is then heat pressed onto the surface of the garment, great for logos.

Embroidery

Everyone is familiar with embroidery, great for logos, not so good for large designs due to weight and texture.

Recyclable Fabrics

We are working with our suppliers to bring recyclable fabrics onto the market in the near future, these garments will have all the technical advantages of tradition materials but will appeal to the more eco-conscious customer.

We are currently trialing 2 fabrics:

1. An 88% recycled polyester mesh / 12% spandex mix.
2. A recycled polyester fabric which has a weight of 145gsm.
This fabric is ideal is ideal for a 100% "eco conscious" garment.

Please contact us for availability, pricing and technical details.
